

PRODUCT INFORMATION SHEET

Clamp universal multimeter

Product description

The meter is equipped with clamps to measure AC current in a single conductor by induction. Used to diagnose and detect faulty electrical components. Used in the automotive, electrical and installation industries.

Characteristics

- TRUE RMS measures alternating current and voltage – precise RMS value for both sinusoidal and deformed waveforms;
- NCV enables non-contact detection of live current in cables;
- DATA HOLD keeps the currently measured value on the display;
- SELECT – function selection;
- RANGE – switches between auto and manual selection of the operating range;
- MIN / MAX keeps the minimum / maximum measurement readings on the display;
- multimeter measures DC and AC voltage up to 600 V, AC current up to 600 A and resistance up to 60 MΩ, performs diode and continuity tests;
- large LCD screen with backlight enables to display and read 5999 counts even in the dark;
- built-in flashlight enables work at night and in the dark;
- comfortable, ergonomic, compact shape allows comfortable, single-hand operation;
- 3x1,5 V AAA battery power supply, longer battery life thanks to Auto Power Off;
- max. diameter of the measured cable is 20 mm;
- test leads included.
