

PRODUCT INFORMATION SHEET

LOTZEN Transparent safety glasses uni blue

Product description

Glasses intended for individual eye protection against mechanical hazards. Compliant with EN 166: 2001. The lenses of glasses are made of transparent profiled polycarbonate, so they provide side eye and temples protection. Soft lining around the lenses and a removable band prevent the glasses from slipping and sliding. The temples are made of polycarbonate, while the temples tips are made of high-quality TPR material (thermoplastic rubber). Additionally, temples are incorporated with specialised ventilation channels that prevent the lens from fogging.

The glasses protect against low energy chipping of solids produced during grinding, drilling, cutting, sawing and crushing. They are perfect for typical works in industry and services, construction, in the workshops, forestry, in technical or municipal works.

The product can be used with corrective glasses. They are not suitable for use during welding.

Characteristics

- material: polycarbonate – lens and frame / TPR longitudinal temples / PVC bridge;
- additional elastic strap – detachable;
- an additional internal nylon frame, finished with a soft EVA foam;
- elastic, removable, adjustable band;
- optical class: 1 (+ 0,06 dioptries – designed for continuous wear);
- mechanical resistance: F (low impact Energy 45 m/s);
- filter type: 2C – UV filter with correct colour recognition;
- lens colour (degree of blackout) 1.2 – transparent;
- standards: EN 166:2001;
- scratch-resistant and fog-resistant lenses;
- Temples with ventilation channels;
- rimless glasses;
- light and durable design;
- fashionable design, black colour with blue accents.
